What is
webeyecms?

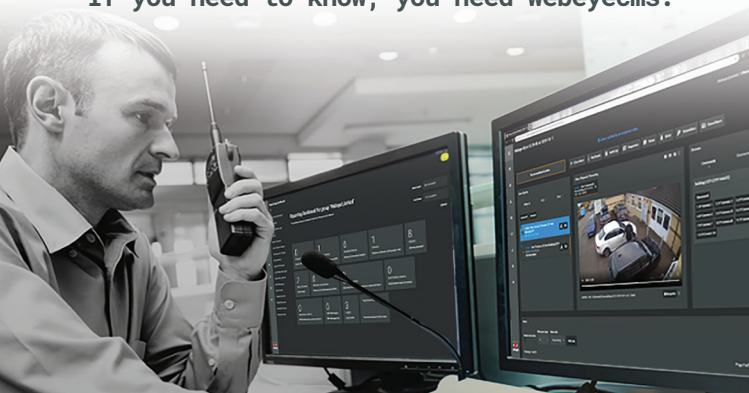

Receiving dependable information is vital to maintain credible security”

Clive Mason, Founder of Webeye Limited

webeyecms is an intelligent SaaS platform that uses unique and fail-safe methods via the cloud to send, receive, monitor and manage alarms.

- Automated total alarm management system for only a small monthly fee
- Handles, processes then delivers alarms directly to any number of your own designated computers or mobile devices
- Optional A.I. and machine learning to verify human or vehicle activity which drastically reduces false alarms
- Patented PADARC* which sets the industry benchmark for fail-safe alarm delivery
- Fully audited - so you know when and who has answered the alert
- Doesn't rely on 'Send and Forget' type technologies used by our competitors such as email or SMS

If you need to know, you need webeyecms.

The world's most versatile cloud monitoring platform.

Why you need it

- **webeyecms** is a low cost solution to meet the increasing demands faced by the security industry. The technology within webeyecms can handle a vast amount of data to quickly manage and deliver credible information from your security systems that is vital to maintain a successful business.
- webeyecms is an easy to use system that puts the power into your hands because we believe as professionals, you are the best qualified to control your security 'estate'.

How it works

- webeyecms is a SaaS platform that sits on the cloud to monitor and manage alarms.
- **PADARC*** is Webeye's unique and patented methodology for fail-safe alarm delivery.
- Webeye works with leading integration partners to offer total security solutions.

What are the benefits

- Grow your business with your existing resources.
- An effective management tool to improve your competitiveness.
- Optional **CALIPSA** that uses A.I and machine learning to verify alarms and stop you wasting time dealing with false alarms.
- A low cost alternative / enhancement to a traditional monitoring station.

Monitored security that puts you in control.

Alerts and video

webeyecms sends a notification / short video clip directly to any number of designated smart phones or browsers.

The world's fastest response

Once triggered a notification takes only a few seconds to reach your device.

Powerful management tool

webeyecms performs a useful management function. e.g. all information about your security 'estate' can be organized into a simple to view dashboard.

Cloud storage

All events are stored and video events can be viewed for 2 years or longer if required.

Monitoring Station 24/7, 365 days a year

We've fully automated the alarm receipt, alarm handling and alerting process. We're inherently efficient and reliable because we're not limited by human alarm operator capabilities.

Full audit trail

You can easily view your alarm history. The browser version not only tells you when an alarm was sent but also who viewed it.

100% reliability**

100%

Large multi-national companies are now reaping the benefits and enjoying the efficiencies of using webeyecms.

*Progressive Alarm Delivery And Alarm Response Confirmation.

** To date of publication (2019) we have never had a total system failure.

1. Intrusion detected by motion viewer

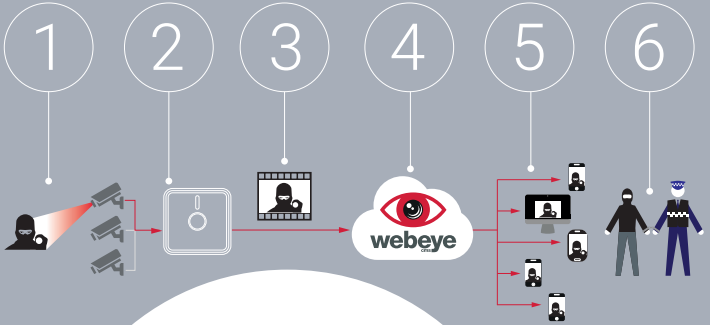

2. Wirelessly sent to panel

3. Notification/clip sent to webeyecms

4. webeyecms processes notification

5. Sent to ALL stakeholders simultaneously

6. Verification needed to catch the criminal!

Calipsa False Alarm Filtering Platform

Uses A.I. to verify human or vehicle activity

Calipsa's alarm filtering platform is the global leader in false alarm reduction. It is an option within webeyecms that uses the latest machine learning technology to analyse the video clip to filter out non-human or vehicle activity.

1

Webeye sends the clip to Calipsa for verification

2

Calipsa filters out alarms not caused by human or vehicle activity

3

Once verified by Calipsa, confirmation is displayed within Webeye

No expensive infrastructure

If you have a system approved by Webeye we'll integrate it with your own smart devices for a fully professional alarm and monitoring solution.

No software required

All the amazing stuff sits on the cloud. No contract, just a pay as you go service that you only pay for when a system is commissioned.

No dedicated receiving equipment

Monitor your security from wherever you are. All the user needs is a computer or smart device connected to the Internet.

Full audit trail

You can structure the system so you can view how your security 'estate' is performing and it keeps an audit trail of who and when a notification was answered.

Integrated A.I. for accurate verification

Improve alarm accuracy with the option of the CALIPSA False Alarm Filtering Platform which verifies human or vehicle activity.

Generates recurring revenue

Installers, see your income grow by charging your customers a monthly fee for this automated monitoring service.
